SMARTBins

CREST FASTENERS

SMARTBins MANAGE automates inventory replenishment in stockrooms and trucks using phones, RFID, or weight sensor bins. SMARTBins MANAGE includes all the benefits of SMARTBins REPLENISH, which is our mobile ordering app, plus the ability to track consumption and manage consignment.

SMARTBins offers 3 levels of automated replenishment

SMARTBins REPLENISH	SMARTBins MANAGE	SMARTBins OPTIMIZE
Scan barcodes to reorder or count	*Track usage. Know quantity on hand.*	*Optimize point-of-use inventories using analytics*

SMARTBins REPLENISH

Scan barcodes to reorder or count

Mobile App (IOS, Android)
Includes:

- Unlimited users, items, suppliers
- Simple reporting
- Barcode label designer
- QuickBooks integration
- Certification: SOC II Type 2
- User permissions
- Audit trail
- Easily upgrade to SMARTBins Manage or Optimize

Benefits of REPLENISH:

→ 10x faster than e-commerce
→ Decrease errors, stockouts, overstock
→ 1 app to reorder from any supplier
→ Reduce PO costs by up to 90%

SMARTBins MANAGE

Track usage. Know quantity on hand.

Mobile App
Includes everything in REPLENISH, plus:

- Track usage, jobs, orders, receives and quantity on hand
- Work order signature and image capture
- Advanced reporting: customize and schedule 83 reports
- Quick Lists, transfers, staging, serial #s, lot #/dates
- Alerts Dashboard with analytics

All the benefits of REPLENISH, plus:

→ Real-time visibility of on-hand status
→ Collect AR faster with job photos
→ Use consigned inventory
→ Be proactive with email alerts

SMARTBins OPTIMIZE

Optimize point-of-use inventories using analytics

Mobile App, RFID, SMARTBins weight Sensor Bins
Includes everything in MANAGE, plus:

- Min/Max Tuning Dashboard: calculates what each item's Min/Max should be based on recent usage, then quantifies cash savings and reduced carrying costs
- Kitting
- Requisitions
- Project spend limits
- Tool crib management
- Asset maintenance tracking

All the benefits of MANAGE, plus:

→ Reduce inventory and costs up to 73%
→ Analytics show potential cash savings

MANAGE inventories to reduce stockouts

Scan items as they are used. The app records the usage and continually compares the quantity on hand with your set minimum, and triggers an automated order up to your set maximum.

Track consigned or customer-owned inventory with ease

SMARTBins MANAGE works for consigned or customer-owned inventories. Managing consigned inventory is easy with SMARTBins because we capture all usage transactions, allowing the distributor to invoice accurately, and provide one set of books for reconciliation for the end-user and distributor.

Manage inventory on service trucks

Create work orders, snap a photo of the beginning and end of the work, and get a signature. Manage parts from any supplier from our supplier independent app.

Reduce procurement by 90%

SMARTBins sends automated orders when replenishment is triggered, preventing the need to type and fax POs. Plus, the same order that is automatically sent to the supplier for replenishment becomes an import template for the end user's accounting department to import into their business system, eliminating all data entry. QuickBook integration is included.

Manage serial and lot numbers, and expiration dates

Manage serial number inventory. Receive email notification before lot numbers and expiration dates expire.

Get email alerts on 73 customizable reports, such as:

→ Reports to order approvers that include the list of items being ordered that
   need to be approved. Approve/reject button included in the email.
→ Reports about current orders to suppliers
→ Reports about item usage and inventory turns
→ Reports on expiring items

Free 30-Day Trial. Very simple setup.
→ Fill out our form with: list of items, name and address of stockroom
→ We'll set things up and send barcode labels
→ Download the app from Apple or Google Play
→ Scan to order, count, use or receive
→ Enjoy our free 30-day trial with training and support
