

## SMARTBins REPLENISH

Mobile app for replenishment of stockroom and truck inventory

SMARTBins REPLENISH is 10x faster than replenishing inventory through an e-commerce site or with a pencil and clipboard because it only requires a barcode scan and a tap to send the order to your distributor. It saves time, reduces errors and costs, and allows you to migrate in the future to other SMARTBins offerings that will optimize inventory levels.

### SMARTBins offers 3 levels of automated replenishment

#### SMARTBins REPLENISH

Scan barcodes to reorder or count

#### Mobile App (IOS, Android) Includes:

- Unlimited users, items, suppliers
- Simple reporting
- Barcode label designer
- QuickBooks integration
- Certification: SOC II Type 2
- User permissions
- Audit trail
- Easily upgrade to SMARTBins Manage or Optimize

#### Benefits of REPLENISH:

- 10x faster than e-commerce
- Decrease errors, stockouts, overstock
- 1 app to reorder from any supplier
- Reduce PO costs by up to 90%

#### SMARTBins MANAGE

Track usage. Know quantity on hand.

#### Mobile App Includes everything in REPLENISH, plus:

- Track usage, jobs, orders, receives and quantity on hand
- Work order signature and image capture
- Advanced reporting: customize and schedule 83 reports
- Quick Lists, transfers, staging, serial #s, lot #/dates
- Alerts Dashboard with analytics

#### All the benefits of REPLENISH, plus:

- Real-time visibility of on-hand status
- Collect AR faster with job photos
- Use consigned inventory
- Be proactive with email alerts

#### SMARTBins OPTIMIZE

Optimize point-of-use inventories using analytics

#### Mobile App, RFID, SMARTBins weight Sensor Bins Includes everything in MANAGE, plus:

- Min/Max Tuning Dashboard: calculates what each item's Min/Max should be based on recent usage, then quantifies cash savings and reduced carrying costs
- Kitting
- Requisitions
- Project spend limits
- Tool crib management
- Asset maintenance tracking

#### All the benefits of MANAGE, plus:

- Reduce inventory and costs up to 73%
- Analytics show potential cash savings

## Benefits of SMARTBins REPLENISH

- Automate paper-based ordering or counting with our simple phone-scanning app
- 10x faster than manual ordering/counting or e-commerce sites
- Decrease errors, stockouts and problems with bin stuffing
- Use one app to reorder from all suppliers
- Decrease procurement costs by up to 90% by reducing POs
- Use Min/Max Tuning Dashboard for order guidance

---

## Get reports that drive efficiency

### Get customizable reports emailed regularly, such as:

- List of items for approval. Approve/reject button included in the email notification
- Items in stockroom listed by suppliers
- Current orders to suppliers
- Cycle counting by inventory classification, based on inventory turns

---

## SMARTBins makes orders and inventory counts more efficient

- Orders - Scan a barcode and enter the quantity. Order goes to the supplier's ERP.
- Counts - Scan the item and type in quantity remaining. If quantity on hand is less than the minimum, SMARTBins will suggest an order up to the maximum. SMARTBins will calculate and schedule your items that should be counted based on turns. Keeps track of items counted and reports

## How you use SMARTBins Replenish

### Step 1

Scan to order or count items using a phone's camera. Capture with one scan: customer name, item number, location, package quantity, supplier, etc.

### Step 2

Tap "submit" to send orders through SMARTBins to the distributor's ERP. No web searches or faxing.

Free 30-Day Trial. Very simple setup.

- Fill out our form with: list of items, name and address of stockroom
- We'll set things up and send barcode labels
- Download the app from Apple or Google Play
- Scan to order, count, use or receive
- Enjoy our free 30-day trial with training and support
